

Azalea Software Proudly Sponsors Award Winning Lava Lamp Webcam

SEATTLE - JetCityOrange's Lava Lamp webcam (www.JetCityOrange.com/Lava-Lamp/) was named one of 2008's most interesting webcams by EarthCam. Founded in 1996, EarthCam is the recognized leader in providing webcam content, technology, and software. A panel of VIP judges including actor Pauly Shore, NY Nicks assistant coach Phil Weber, singer songwriter Tommy James, and Beauty and the Geek winner Amanda Corey. www.earthcam.com/top25/2008/

The webcam is focused on a pair of Lava Lites and is the only such webcam on the internet. JetCityOrange hosts this unique webcam to fill this obvious void. Available through your browser, the Lava Lamp web cam is a look back into the glory days of old. Now the magic of Lava Lamps is a mouse click away 24/7/365.

JetCityOrange hosts this unique webcam to fill this obvious void. Available through your browser, the Lava Lamp web cam is a look back into the glory days of old. Now the magic of Lava Lamps is a mouse click away 24/7/365.

"My Lava Lamp webcam lives in Azalea Software's server closet using one of their computers and their fast internet connection to update itself every 10 seconds." says Jerry Whiting, JetCityOrange's publisher. "Because of Azalea's generosity, the Lava Lamp webcam was able to handle an unexpected increase in traffic on New Year's Eve." Azalea Software, Inc., Seattle WA, publishes barcode software (www.azalea.com).

JetCityOrange (a website like no other) was founded in 1999 and is in Seattle WA. Jerry Whiting, Dad of 3 count 'em 3 teen-age boys & self-confessed barcode nerd, hails from Cleveland and spends way too much time in his workshop a.k.a. The Mad Lab. Webcams, hacking digital cameras, and collecting fine art photography are obsessions of his. Enjoy!
